

Invasive Endangered & Dangerous

Semester-length, hands-on approach to learning about some of the most threatening and threatened members of our shared planet, creating a well-rounded, highly engaging, unforgettable experience!

Once a week on Thursdays
From 1:00pm – 3:00pm
September 9 – December 9, 2027

This biology course will cover a myriad of topics in the natural world, using a huge array of concrete materials and live animals, aiming to not only grow knowledge of specific creatures, but also the methods of zoological science and an ethic of responsible care for creation from a faithful Catholic perspective.

Class limit
of 10 students
$150 per student
($50 discount for additional siblings)
